

I am TOTALLY AGAINST opening doors for Banks, Loan Companies, Credit Unions or any other Bank or Lending Institution from having the "right" to phone or try to communicate with me via my private telephone service. The present No-Call guidelines are working relatively good but there are still some institutios finding loopholes to go around the guidelines that need to be addressed. These loopholes need to also be addressed and CLOSED because I am still getting tooooo many "junk phone calls". Please don't re-open a door for Financial Institutions to start aggravating private individuals with private phones again. TThey still have the United States Postal System to do any corresponding if they want to correspond with someone. They need to stay off my personally funded Phone Line. In anticipation of you protecting the privacy of citizens personally funded telephones,

Thank You, Robert M. Hausmann
